EXECUTIVE SUMMARY

The research presented in this report is a cooperative effort between the Tennessee Higher Education Commission and the University of Tennessee's Center for Business and Economic Research. Using historical data from 2000-2008 as a guide, we project academic awards for various instructional programs and disciplines for Tennessee's public, private for-profit and private non-profit post-secondary institutions through 2018. We link the academic award projections on the supply side of the labor market to anticipated job openings by occupation on the demand side of the labor market. The results provide insight into how well the output of Tennessee's educational institutions matches the anticipated demands of the state's employers. This information can be used by policymakers at all levels in Tennessee, from the legislative and executive branches down to the level of an academic award producing unit, as well as by business and city planners, guidance counselors and employers.

The instructional programs showing the largest projected increase in number of awards are in fields related to healthcare, business, education, and liberal arts. Our projections reflect the growing importance of the healthcare profession in our education system and economy, as seven of the top fifteen and fourteen of the top fifty fastest growing programs are in the healthcare profession. We also examine the top STEM (science, technology, engineering, and mathematics) programs and find that the number of graduates in eight of the top ten fastest growing STEM fields is expected to more than double by 2018; these fields are growing from a small base while demand is growing rapidly. Programs that are contracting the fastest include general business, management/computer information systems, administrative assistant and secretarial science, and journalism. Approximately 360 instructional programs at various award levels are projected to produce zero awards by 2018. In some cases, these programs are ending, but in many cases, programs are being reorganized.

Educational output is especially meaningful to the extent it meets the needs of private and

public sector employers in Tennessee. Because many occupations do not require a highly specific educational award, we aggregate the data into functional groups—*career pathways*—and perform one-to-one matching of groups of academic programs with groups of occupations. The analysis of supply and demand within the pathways allows identification of gaps between projected educational awards and projected job openings. The largest under-supplied career pathways include programming and software development, marketing, human resources, business financial management and accounting, environmental service systems, and construction. The largest over-supplied career pathways include teaching, therapeutic services, science and mathematics, management, administrative and information support, and journalism. The estimated surplus of awards for teaching and therapeutic services is an artifact of the breadth of the career pathways and serves as a caution in interpreting and applying the data to policy. As noted in the report, more refined analyses of the markets for public elementary and secondary teachers and licensed practical nurses and registered nurses show significant shortfalls between projected award production and occupational demand.

Linking academic programs with specific occupations is very difficult for several reasons. First, the linkage between minimum educational requirements and specific occupations will likely be quite accurate for highly specialized awards, especially at the Associate's level and for many advanced degrees. However, many Bachelors' degree fields are more problematic because individuals have the opportunity to work across a range of occupations. Using aggregated career pathways to match sets of academic programs to a range of potential occupations is necessary but can mask underlying surpluses or deficits for specific award-occupation combinations.

Second, business and industry composition vary markedly across the state, and the production of post-secondary awards also varies across the state. Thus, demand for an occupation may be high relative to supply in one community while low

relative to supply in another community. Further, Tennessee does not obtain labor solely from within the state, and individuals with higher levels of educational attainment, especially Master's degrees and PhDs, are more likely to migrate in pursuit of employment opportunities elsewhere. Finally, our projections are based on historical data from 2000-2008; therefore, it is difficult to accurately project awards for newly-emerging fields and impossible

to project awards for fields that have yet to be put in place.

Even with these limitations, the present study provides important information and serves notice that demand data will play an increasingly large role in academic program approval and termination, development of performance funding incentives for institutions, and student advising.

INTRODUCTION

Tennessee had a momentous year in 2010 with the receipt of a large federal Race to the Top grant and passage of several important education-related legislative initiatives. Especially notable was the Complete College Tennessee Act of 2010 which was signed into law by Governor Bredesen in January. While the state's public higher education institutions have historically been funded based largely on enrollment, the new outcomes-based funding formula will place greater emphasis on retention and graduation. The initiatives that Tennessee is embarking on offer the potential to fundamentally transform the state's educational pipeline to the betterment of state residents and the state economy.

Outcomes-based funding will place greater pressures on the institutional planning process. Resources will need to be carefully allocated to support growing instructional programs, especially those that reflect the strategic interests of the state and those that have strong employer demand. These decisions will have to be made in an extraordinarily difficult budget environment, and at least in the near term, in the face of weak state and national labor markets.

The research presented in this report is a cooperative effort between the Tennessee Higher Education Commission (THEC) and the University of Tennessee's Center for Business and Economic Research (CBER) and is intended to support the institutional planning process in Tennessee. The report includes projections of awards by instructional program extending out to 2018. Identified are awards and instructional programs that are expected to grow as well as those expected to contract based on historical trends between 2000 and 2008. These projections can be utilized by education policymakers at virtually all levels in Tennessee, from the legislative and executive branches down to the level of an academic award-producing unit.

Also presented in the report are projections of occupational demand between 2008 and 2018, as reflected by anticipated annual position openings by occupation. These estimates, developed by the Tennessee Department of Labor and Workforce

Development, are linked to the projections of academic awards by career programs of study and are discussed more fully below. The occupational demand and academic award supply projections together can support the analysis of potential supply and demand imbalances anticipated in the years ahead. However, the projection process is complex, as is the changing environment within which Tennessee's institutions of higher education operate. As such, the projections presented here cannot be used in isolation but must take into account other information and trends that are occurring on both the supply and demand sides of the market.

The following section of the report discusses the methodology used to develop the supply and demand projections and important caveats that need to be considered when using the estimates. Subsequent sections present key findings, beginning with an overview of broad trends in projected awards and closing with an analysis of potential supply and demand imbalances. Appendices of the report provide documentation and a series of detailed tables that are intended to support the academic planning process. **Appendix 1** shows 2008 award production for Local Workforce Investment Area (LWIA) regions of the state. Detailed projections of awards by individual program of instruction appear in **Appendix 2**. **Appendix 3** presents the public and private shares of award production for 2008. These data can help shed light on the projections because all of forecasts of award supply are aggregated across public and private institutions of higher education. A significant number of award categories for specific instructional programs are projected to produce no graduates in 2018, and these are reported in **Appendix 4**. **Appendix 5** shows the share of graduates from Tennessee institutions of higher education that are working in the state three quarters after the receipt of a degree. These data can be used for a number of purposes, including the analysis of possible in-state imbalances between the supply of awards and the demand for workers across occupational categories. Data for **Appendix 5** were drawn from the series of

studies “School-to-Work: Do Tennessee’s Higher Education Graduates Work in Tennessee?” (<http://cber.bus.utk.edu/tnhe.htm>). **Appendix 6** reports data on each of the career paths—the individual instructional programs contributing to

supply and the individual occupations constituting the demand side of the market. Finally, **Appendix 7** presents information for High-Need Fields in support of the 2010–15 Performance Funding Cycle.

METHODOLOGY

Projections of academic award supply and occupational demand are developed independently and then linked together using *career clusters* and *career pathways*. The discussion below outlines the methodology used to develop the projections and highlights important caveats that need to be considered when using the data, especially in the context of examining possible imbalances between supply and demand.

Supply of Academic Awards

Postsecondary awards for individual instructional programs are projected to 2018. **Table 1** shows the various award levels produced by post-secondary institutions in Tennessee and used in this analysis. Concentrations and minors are not included because there is no way to directly link these awards to the minimum educational requirements of occupations on the demand side of the labor market. As discussed below, it is especially difficult to precisely match supply and demand at the bachelor's level. The reason is that a bachelor's degree in a field can support many possible occupations, while a given occupation may draw students from an array of different fields of study.

Table 1: Types of Awards

Awards of less than 1 academic year
Awards of at least 1 but less than 2 academic years
Associate degrees
Awards at least 2 but less than 4 academic years
Bachelor's degrees
Postbaccalaureate certificates
Masters degrees
Post-Masters certificates
Doctoral degrees
First-professional degrees
First-professional certificates

The Classification of Instructional Programs (CIP) for 2000 is used to categorize the fields of instruction. The supply projections account for all institutions in Tennessee that grant Associate's degrees or more advanced degrees, including all public, private non-profit and private for-

profit institutions that participate in the federal student financial aid program. Aggregate projections that encompass all post-secondary institutions are reported in this study including the appendix tables. **Table 2** provides a listing of the postsecondary institutions included in the analysis.

Data supporting the projections come from the federal Integrated Post-Secondary Education Data System (IPEDS). In analyzing the IPEDS data, it became apparent that the CIP definitions have not always been applied consistently by postsecondary institutions in Tennessee. One problem is that some schools define programs as "general" while other schools may designate a specific degree. A second problem is that some schools reported their data based on the 1990 CIP system for fields of study not present under the 2000 CIP taxonomy. CBER reassigned some data for years 2000–2003 using the national crosswalk between the 1990 and 2000 CIP system to address these issues.

The projections of award production by award level and instructional program are based on regression analysis and from historical data for 2000–2008. Historical trends in award production as reported in IPEDS and the resident population in the 20 to 29 age group provide the foundation for the regression analysis. The 20 to 29 age group was chosen because it represents the primary age cohort for college students and corresponds to an age classification used in the most recent statewide population projections developed by CBER. The projection of the historical trend, along with CBER's population projection for the 20 to 29 age group, enables the long-term forecast of individual awards by CIP to 2018.

The historical awards trend proved to have a greater impact on the supply projections than population demographics, which explained only a small share of the variance. As a result, if the number of awards showed historical growth between 2000 and 2008, it is likely that the projections produced a continuation of this growth trend. (In practice there may be some exceptions based on the up-and-down pattern of award granting for individual years in the 2000-2008 time window.) On the other hand, if the number

---	--

of awards in an instructional program declined between 2000 and 2008, the projections typically produced a continuation of this trend. (Again, there may be exceptions based on the historical year-by-year pattern of award production.) For a number of awards/instructional programs, the supply projections went to zero, indicating the absence of award production.

As valuable as regression analysis is in providing a foundation for forecasting, it cannot account for any significant changes in the pattern of award granting or demographics not captured in the historical data. For example, it is difficult to accurately project awards for newly-emerging fields and impossible to project awards for fields of study that have yet to be put in place. Similarly, if students experience a significant shift in interest for a program of study in the years ahead, this will not be reflected in the supply forecast. Historical patterns of award production may also reflect the reallocation of resources that may have caused award numbers to shrink or expand. For example, a new program of study might have been introduced in 2000 with enrollment capped in 2008. In such a case, the supply projections would assume a continuation of enrollment growth because there is no way to deal with the enrollment cap. Factors like this need to be taken into account when using the projections contained in this report.

Occupational Demand Projections

Projections of employer demand for occupational categories delineated under the standard occupational classification (SOC) system begin with industry-level employment forecasts extending to 2018. Industry data are categorized using the North American Industrial Classification (NAIC) system. Industry employment forecasts were developed using the Annual Tennessee Econometric Model (ATEM) maintained by CBER. In support of this project, CBER created employment projections at a more disaggregated level of industry detail than is typically produced as a part of the annual forecasting cycle reported in the *Economic Report to the Governor of the State of Tennessee* (<http://cber.bus.utk.edu/teflist.htm>). None of the more highly-aggregated estimates previously reported by CBER were altered through this re-estimation process.

The employment forecasts developed by CBER were provided to the Tennessee Department of Labor and Workforce Development (DLWD). The DLWD undertook an independent projection of employment by industry using the CBER projections as reference points. The DLWD forecasts were then run through a NAIC-to-SOC crosswalk matrix that has been developed specifically for Tennessee (based on a number of data sources, including in-state employer surveys). The demand-side crosswalk maps the projections of employment by industry to specific occupational categories and their *minimum* educational and training requirements.

To understand this step it is important to recognize that a business in any given industry can be expected to employ workers across an array of occupational categories. For example, a manufacturing firm will typically employ relatively large numbers of production workers with a range of formal education and training, as well as on-the-job training. The same firm will also employ workers in other occupational categories, such as engineers, computer and information systems managers, human resource managers and operation managers. The NAIC-to-SOC crosswalk is the tool used to translate industry *employment* projections to various *occupational* categories using actual patterns of occupational employment and educational attainment and training in Tennessee. Industries are characterized by employment growth through new business starts and firm expansion as well as employment decline through firm contraction and business closure. The employment projections by industry are intended to capture the net influence of these dynamics on the *number of jobs* in the state economy. However, employer demand and annual position openings will also be affected by workplace dynamics like worker promotions and various forms of separation, such as quits, deaths, and retirements.

The historical awards trend proved to have a greater impact on the supply projections than population demographics, which explained only a small share of the variance.

For example, if a worker retires from her job and the job is filled by a recent college graduate, there is no change in the number of jobs in the economy. But the position opening created a job opportunity for the college graduate. The modeling work of the DLWD translates employment into occupational demand and *annual position openings* and

accounts for this type of workplace dynamic.

Because of the presence of worker transitions, the annual number of replacements needed within an occupational category in a given year generally will not match the change in employment.

The level of employment in an industry and the number of worker positions in an occupational category (for example, the number of engineering manager positions)

might be static and show little or no change from year to year. However, worker separations will give rise to the need to find replacements even if there is no change in the overall level of employment and the number of occupational positions as with the example above. Even industries and occupations showing a net downward trend in employment and occupational positions may need to hire replacement workers on an annual basis due to separations. An example is engineering managers. The number of occupational positions in this SOC category is expected to fall from 3,156 to 3,023 between 2008 and 2018 in Tennessee. However, average openings for this occupation are expected to tally 64 per year.

Associated with each occupational category in the SOC system is a minimum training or educational requirement as shown in **Table 3**. In practice, many occupations will require additional forms of training and education along with other specific skill sets. The minimum educational and training requirements in the SOC system are based on what is *typically observed* for a given occupational category in the economy. There certainly will be exceptions to these minimum requirements within business establishments, and they will likely change over time. For example, the prevailing minimum requirement for an occupation might be a Master’s degree, but someone with a Bachelor’s degree might be eligible for the position by virtue of accruing on-the-job training and having access to a firm’s internal job ladder. Further, individuals with higher levels of training and educational attainment will potentially qualify for the job. For example, an occupation with a typically-observed minimum requirement of a Bachelor’s degree would conceivably be open to a person with a Master’s degree or a PhD.

The linkage between minimum educational requirements and specific occupations will likely be quite accurate for highly specialized awards, especially at the Associate’s level and for many advanced degrees. On the other hand, many Bachelors’ degree fields will be more problematic because individuals will have the opportunity to work across a range of occupations. The methodology used here reflects the prevailing pattern of occupations and educational requirements for individuals in Tennessee, and there will be exceptions to this prevailing pattern in practice.

Table 3: Types of Education Experience Requirements

<ul style="list-style-type: none"> First professional degree Doctoral degree Master's degree Bachelor's or higher degree, plus work experience Bachelor's degree Associate degree Postsecondary vocational training Work experience in a related occupation Long-term on -the-job training Moderate-term on -the-job training Short-term on -the-job training
--

The linkage between minimum educational requirements and specific occupations will likely be quite accurate for highly specialized awards, especially at the Associate’s level and for many advanced degrees. On the other hand, many Bachelors’ degree fields will be more problematic because individuals will have the opportunity to work across a range of occupations.

Analyzing Supply and Demand

Instructional programs are linked to occupations using a CIP-to-SOC crosswalk that considers award levels and the prevailing pattern of educational awards for workers in different occupations. Employment is linked to occupations through the NAICS-to-SOC crosswalk. A practical problem with linkages between supply and demand at a highly disaggregated level is the absence of a one-to-one mapping between instructional awards and occupations. For example, a given instructional program may supply

The one-to-one matching between groups of instructional programs and groups of occupations is achieved by using the Perkins IV Crosswalk. This linkage mechanism ties together career clusters and career pathways on the supply side of the market and the SOC system on the demand side of the market.

multiple occupations yielding a “one-to-many” assignment. It is also the case that multiple instructional awards may supply multiple occupations producing a “many-to-many” assignment. Focusing on disaggregated data that produce a one-to-many or many-to-many assignment produces too much ambiguity to be of use for most planning purposes. Therefore, the approach taken in this report is to make assignments between groups of instructional awards and occupational groupings that produce a one-to-one matching. A problem with this approach is the inability to match specific awards with specific occupations—but as noted immediately above, this is generally not possible regardless of methodological approach. The one-to-one matching between groups of instructional programs and groups of occupations is achieved by using the Perkins IV Crosswalk. This linkage mechanism ties together career

The state-level orientation of the projections needs to be taken into account when analyzing potential supply and demand imbalances. The demand analysis is built around statewide employer needs in Tennessee while the supply analysis focuses on the production of awards and degrees from public and private post-secondary institutions in the state.

clusters and career pathways on the supply side of the market and the SOC system on the demand side of the market. The 16 career clusters in the Perkins model are shown in **Table 4** while **Table 5** shows the breakdown of the more specific career pathways that are present in Tennessee. It is important to emphasize the focus on *career pathways*, which may take students through a series of instructional programs and award levels to prepare themselves for a career and employment. As described in the documentation for the Perkins IV Crosswalk:

“This...might be more convenient to use for planning and administrative purposes, when both instructional programs and occupations need to be considered and where double-counting of students or the jobs that they employ is concern. One potential application is the prioritization of programs of study and/or technical skill assessment development according to which clusters or pathways have more students, lead to more jobs or lead to jobs that are high skill, high wage or high demand.”

The state-level orientation of the projections needs to be taken into account when analyzing potential supply and demand imbalances. The demand analysis is built around statewide

employer needs in Tennessee while the supply analysis focuses on the production of awards and degrees from public and private post-secondary institutions in the state. Business and industry composition, and thus occupational patterns, vary markedly across the state, while the production of post-secondary awards also varies across the state. This means that the demand for an occupation may be high relative to supply in one community while low relative to supply in another community.

Another implication of the statewide focus is that it does not account for employer needs at the broader regional, national and international levels. Graduates of post-secondary institutions in Tennessee commonly migrate outside the state in pursuit of jobs. Paralleling this phenomenon on the supply side of the labor

market is the in-migration of individuals from other states and countries who seek employment opportunities in Tennessee. Worker mobility is less important within occupational categories

Worker mobility is more problematic for occupations requiring higher levels of education, as highly educated individuals are more likely to migrate in pursuit of employment opportunities.

requiring low or modest levels of training and education because individuals with such traits tend to be less mobile and typically can be found in local labor markets. Mobility is more problematic for occupations requiring higher levels of educational attainment because the demand for these occupations may be national or international in scope. As a result, individuals with higher levels of educational

attainment—especially Master’s degrees and PhDs—are more likely to migrate in pursuit of employment opportunities elsewhere.

Table 4: Career Clusters and Cluster Definitions

CLUSTER	TITLE	DESCRIPTION
1	Agriculture, Food and Natural Resource Cluster	The production, processing, marketing, distribution, financing, and development of agricultural commodities and resources including food, fuel, fiber, wood products, natural resources, horticulture, and other plant and animal products/resources.
2	Architecture and Construction Cluster	Careers in designing, planning, managing, building and maintaining the built environment.
3	Arts, Audio/Video Technology and Communications Cluster	Designing, producing, exhibiting, performing, writing, and publishing multimedia content including visual and performing arts and design, journalism, and entertainment services.
4	Business, Management and Administration Cluster	Business Management and Administration careers encompass planning, organizing, directing and evaluating business functions essential to efficient and productive business operations. Business Management and Administration career opportunities are available in every sector of the economy.
5	Education and Training Cluster	Planning, managing and providing education and training services, and related learning support services.
6	Finance Cluster	Planning, services for financial and investment planning, banking, insurance, and business financial management.
7	Government and Public Administration Cluster	Executing governmental functions to include Governance; National Security; Foreign Service; Planning; Revenue and Taxation; Regulation; and Management and Administration at the local, state, and federal levels.
8	Health Science Cluster	Planning, managing, and providing therapeutic services, diagnostic services, health informatics, support services, and biotechnology research and development.
9	Hospitality and Tourism Cluster	Hospitality & Tourism encompasses the management, marketing and operations of restaurants and other foodservices, lodging, attractions, recreation events and travel related services.
10	Human Service Cluster	Preparing individuals for employment in career pathways that relate to families and human needs.
11	Information Technology Cluster	Building Linkages in IT Occupations Framework: For Entry Level, Technical, and Professional Careers Related to the Design, Development, Support and Management of Hardware, Software, Multimedia, and Systems Integration Services.
12	Law, Public Safety, Corrections and Security Cluster	Planning, managing, and providing legal, public safety, protective services and homeland security, including professional and technical support services.
13	Manufacturing Career Cluster	Planning, managing, and performing the processing of materials into intermediate or final products and related professional and technical support activities such as production planning and control, maintenance and manufacturing/process engineering.
14	Marketing Sales and Service Cluster	Planning, managing, and performing marketing activities to reach organizational objectives.
15	Science, Technology, Engineering and Mathematics Cluster	Planning, managing, and providing scientific research and professional and technical services (e.g., physical science, social science, engineering) including laboratory and testing services, and research and development services.
16	Transportation, Distribution, and Logistics Cluster	Planning, management, and movement of people, materials, and goods by road, pipeline, air, rail and water and related professional and technical support services such as transportation infrastructure planning and management, logistics services, mobile equipment and facility maintenance.

SUPPLY PROJECTIONS

Regional Awards

Tennessee is rich in educational institutions with over 100 institutions spread across 13 different local workforce investment areas (LWIA). Institutions range from the large campuses of the UT system to much smaller community colleges serving the specialized needs of local communities. Many students (particularly students with graduate degrees) will ultimately leave the area following graduation. However, those students contribute to the local economy while in school and add to the area's attractiveness for local employers who can recruit those students who desire to stay in the local area. **Table 6** presents the total 2008 degree awards for each of the LWIAs (see also, **Figure 1**). Detail by type of award can be found in **Appendix 1**.

The Nashville area (LWIA 9) leads the state in awards, with area institutions granting more than 17,000 awards in 2008. Schools in the Memphis area (LWIA 13) granted approximately 9,000 awards, followed by Knox County institutions

(LWIA 3), which granted about 7,500 awards. Schools in LWIA 5 (Chattanooga area) granted 5,100 awards, followed by LWIA 11 in West Tennessee with about 4,100 awards granted. As **Appendix 1** illustrates, the regions differ dramatically on the mix of award types granted. In Knox County, almost 75 percent of all awards consisted of Bachelor's or Master's degrees. In contrast, in LWIA 10, about 90 percent of 656 degrees were either Associate's degrees (75 percent) or Bachelor's degrees (16 percent). In LWIA 13 (Memphis area), about 22 percent of the total awards granted in that area consisted of awards of less than one academic year, the highest percentage of such awards in the state.

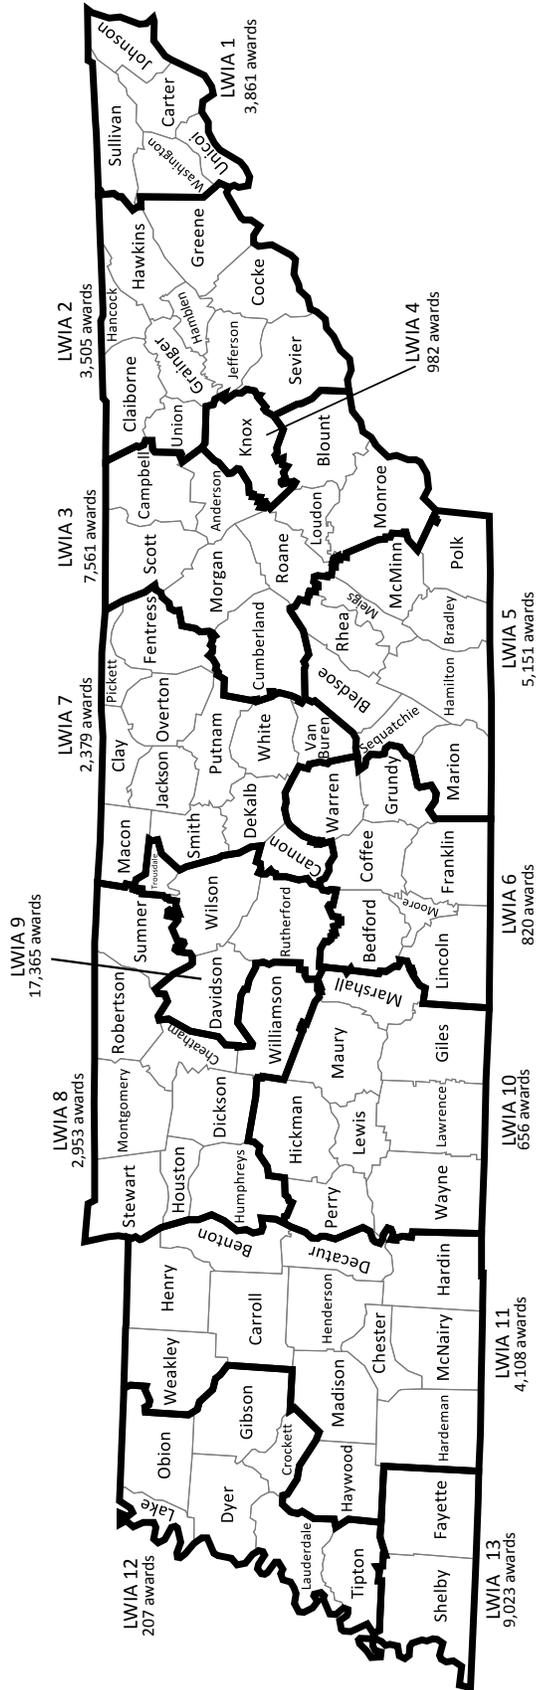

Aggregate Awards

The following discussion presents the results for our supply projections. We begin our discussion with an aggregate picture of the total number of awards by type and by year. We present three

Table 6: Summary of 2008 Awards by Labor and Workforce Investment Area

LWIA	Counties	Total Awards	
		Number	Percentage of total
LWIA 1	Carter, Johnson, Sullivan, Unicoi, and Washington Counties	3,861	6.6
LWIA 2	Claiborne, Cocke, Grainger, Greene, Hamblen, Hancock, Hawkins, Jefferson, Sevier and Union Counties	3,505	6.0
LWIA 3	Knox County	7,561	12.9
LWIA 4	Anderson, Blount, Campbell, Cumberland, Loudon, Monroe, Morgan, Roane and Scott Counties	982	1.7
LWIA 5	Bledsoe, Bradley, Hamilton, McMinn, Marion, Meigs, Polk, Rhea and Sequatchie counties	5,151	8.8
LWIA 6	Bedford, Coffee, Franklin, Grundy, Lincoln, Moore and Warren Counties	820	1.4
LWIA 7	Cannon, Clay, DeKalb, Fentress, Jackson, Macon, Overton, Pickett, Putnam, Smith, Van Buren and White Counties	2,379	4.1
LWIA 8	Cheatham, Dickson, Houston, Humphreys, Montgomery, Robertson, Stewart, Sumner and Williamson Counties	2,953	5.0
LWIA 9	Davidson, Rutherford, Trousdale, and Wilson Counties	17,365	29.6

LWIA 11	Benton, Carroll, Chester, Decatur, Hardeman, Hardin, Haywood, Henderson, Henry, McNairy, Madison, and Weakley Counties	4,108	7.0
LWIA 12	Crockett, Dyer, Gibson, Lake, Lauderdale, Obion and Tipton Counties	207	0.4
LWIA 13	Fayette and Shelby Counties	9,023	15.4
TOTAL		58,571	100.0

Figure 1: Summary of 2008 Awards by Labor Workforce Investment Area

Note: Total awards, all areas: 58,571.

figures that show both the historical trend for the years 2000-2008 and our projections for 2009-2018. We then present supply projections by program using CIP codes at the two digit and six digit level, and also by award type.

Figure 2 presents projections for awards by year for the lowest levels of educational attainment required. Specifically, we look at awards that require less than one academic year, those that require at least one but less than two years, and finally awards that normally require at least two but less than four academic years.

The overall trend for the number of graduates with certificates awarded with less than one academic year, and awards requiring at least one but less than two academic years is very similar, both increasing by approximately 4,000 graduates between 2000 and 2018. Specifically, the number of graduates receiving certificates requiring less than one academic year is projected to be 5,500 in 2018 (left scale). Medical/Clinical assistant is the largest category of award of less than one academic year. The number of graduates receiving certificates requiring at least one but less than two academic years is projected to be 5,770 in

2018 (left scale). The certificates awarded in this category also include several related to healthcare and certificates awarded for specialized repair fields such as autobody/collision and repair and diesel mechanics technician. On the other hand the number of graduates with at least two but less than four academic years is projected to decline from 2000, with less than 100 certificates awarded in 2018 (right scale). However, note that the number of awards is similar to the number in 2008. This category contains very specialized degrees (e.g. pre-ministerial studies, bible/biblical studies, HVAC), with radiation therapists comprising over half of total graduates in this category by 2018.

Figure 3 reflects our projections for the number of Associate's, Bachelor's, Master's, and Doctoral degrees through 2018. In all four cases, we project an increase in the number of awards. We project the fastest growth for Associate's and Doctoral degrees over the next decade, increasing by 71 and 73 percent, respectively. Bachelor's degrees is the largest category of degree awards, and the number of graduates is projected to reach 39,700 by 2018, a 38 percent increase over the next decade. We also project 40 percent growth in Master's degrees,

Figure 2: Certificate Awards by Academic Year

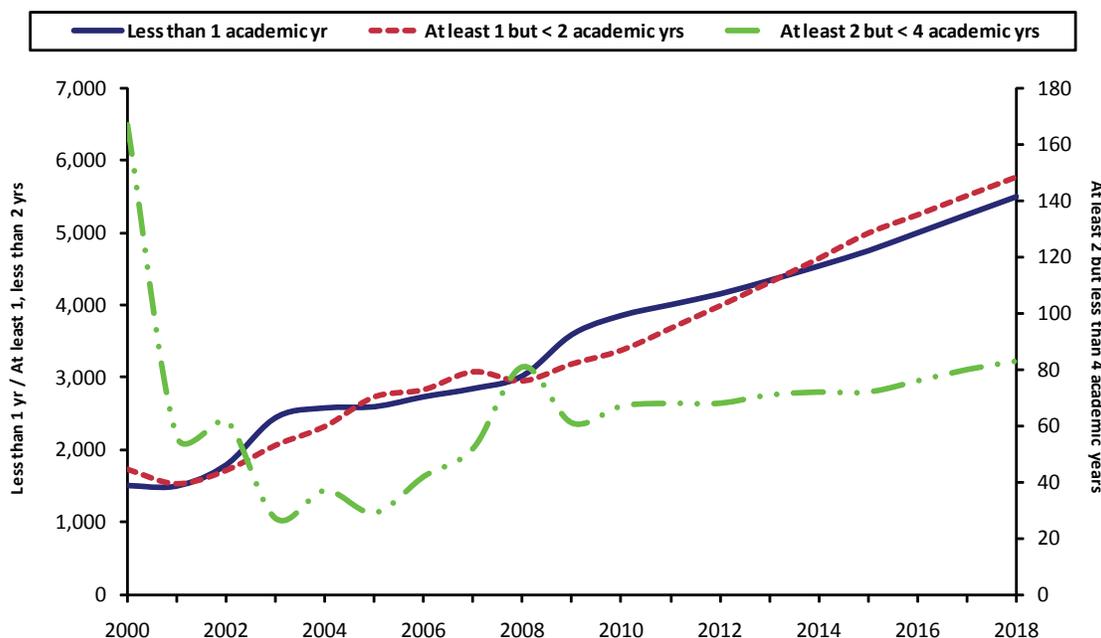

Figure 3: Degree Awards by Academic Year

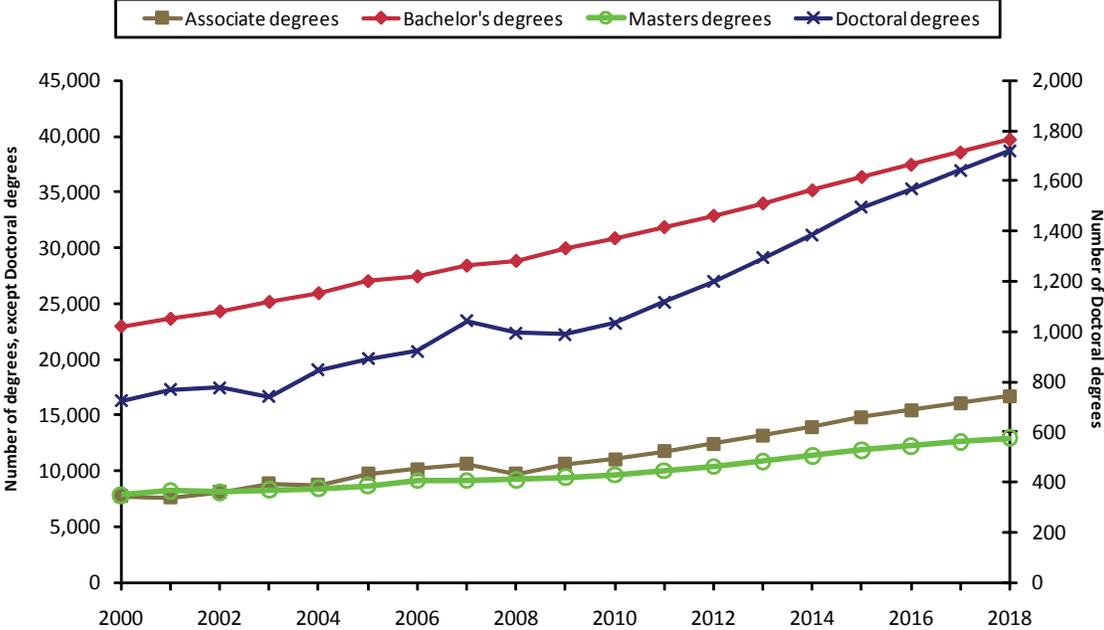

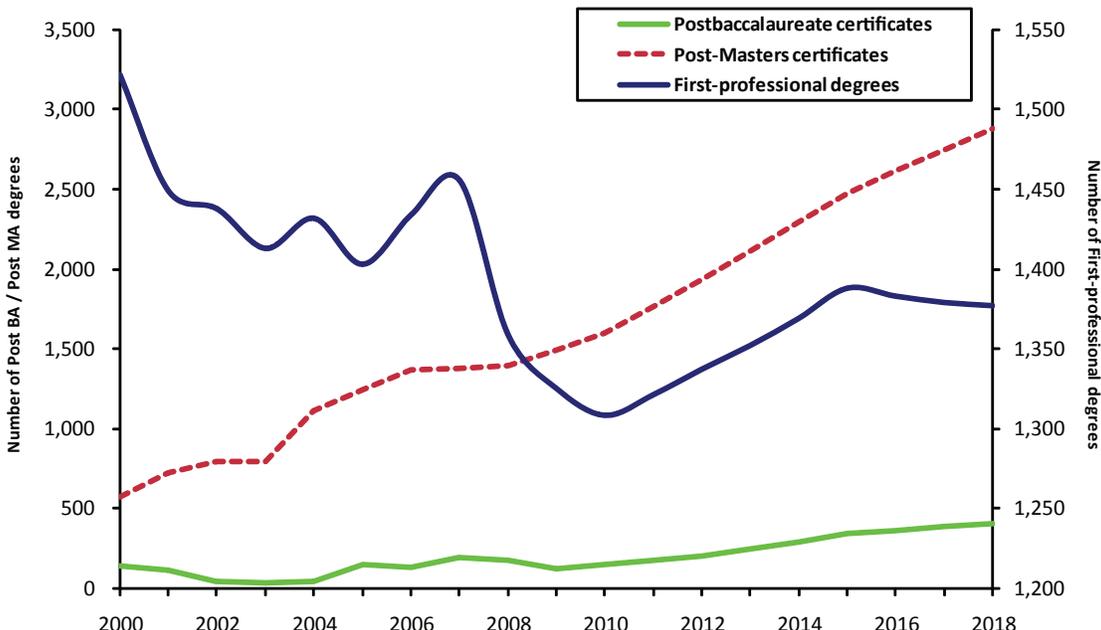

Figure 4: Post-BA, Post-MA, and First-Professional Awards by Academic Year

increasing from 9,200 awards in 2008 to 12,970 awards by 2018.

Figure 4 presents projections for post-baccalaureate, Post-Master's certificates and first-professional degrees. Post-baccalaureate and Post-Master's certificates are predominately granted in various teaching and education related categories. We project that the number of graduates with post-baccalaureate and Post-Master's certificates will more than double in the next decade. Specifically, we project that the number of graduates with post-baccalaureate certificates will increase from approximately 170 in 2008 to 400 by 2018. Further, we project that the number of graduates with Post-Master's certificates will increase from approximately 1,400 in 2008 to 3,000 by 2018.

First professional degrees include (in descending order of annual awards) law, medicine, pharmacy, divinity, optometry, dentistry, and veterinary medicine. The historical data for first-professional degrees reflect a slow decline in degrees from 2000 through 2007. Thus, we do not project a significant increase in the number in first-professional degrees. Our projections reflect that the number of students with first-professional degrees will slowly increase from 2010 to 2018, increasing from 1,321 degrees to 1,377 degrees in 2018.

Instructional Programs and Awards

The next series of tables reflects historical supply data and projections for individual programs using CIP codes. We begin with aggregated CIPs, but detailed projections for each CIP are located in **Appendix 2**. These data are for all Tennessee institutions, both public and private. Historical data on the share of awards granted by public versus private institutions are provided in **Appendix 3**.

The conclusions in the following tables should be of value for planning purposes and as a tool for resource allocation. Educational institutions and planners must consider projected increases in total

graduates for individual programs (e.g., accounting versus economics) but should also consider their broad attainment goals, e.g. Associate's degrees versus Bachelor's degrees, for growth in specific instructional programs. The goal is for the tables to allow an examination of future trends at the macro level of degree types as well as down to the departmental level to examine specific majors and the classes needed to fulfill major requirements. Because our supply forecast is based on historical trends, our projections assume that these broad trends will continue. However, we cannot project newly-emerging fields or fields that do not yet exist; thus, some caution is warranted when using these forecasts.

The health profession and related clinical sciences (CIP 51) is projected to add the largest number of graduates, nearly doubling by 2018.

We first present the data using a 2-digit CIP code in **Table 7**. These 38 programs are listed in ascending CIP order and include awards at all levels of attainment. We present the number of graduates from 2000-2008, followed by our forecast for 2018. We also present the average number of graduates for the period from 2000-2008 and 2008-2018 to allow for smoothing of the endpoints.

The final column is the difference in these two columns and reflects the change in number of graduates.

Nearly every program is projected to grow during the next decade when compared to the previous eight years. The health profession and related clinical sciences (CIP 51) is projected to add the largest number of graduates, growing from 11,124 graduates in 2008 to 21,559 by 2018. This increase of approximately 10,400 graduates is a 6.8 percent compounded annual growth rate. By 2018, the number of graduates in the health field will almost double the number of graduates in business, the next largest CIP. Graduates with a liberal arts degree (CIP 24) and graduates with an education degree (CIP 13) are also projected to grow quickly and to add a significant number of graduates by 2018. Specifically, the number of liberal arts graduates will increase by approximately 2,600 students, a 4.9 percent annual

Table 7: Instructional Program Forecast, 2-Digit CIP Summary, Awards by Academic Year

growth rate. The number of graduates with an education degree will increase by approximately 4,150, a 5.1 percent annual growth rate. Finally, graduates with a degree in business, management, marketing or related business field (the second largest CIP by graduates) are projected to increase by approximately 2,200 students to 11,335, though with a slower annual growth rate of 2.2 percent.

Several CIPs remain significant sources of graduates but are not expected to experience much growth in the coming years. For example, Engineering (CIP 14) and Engineering Technologies Technicians (CIP 15) together had 2,500 graduates in 2008 but are expected to add only 500 graduates from 2008-2018. Likewise, psychology will produce approximately 2,600 graduates in 2018, only 556 higher than the number of graduates in 2008.

The next two tables—**Tables 8 and 9**—reflect historical data and projections by program using the 6 digit CIP code. We present results only for the top ten largest growing and declining CIPs. The full listing of programs by 6-digit CIP can be found in **Appendix 2**.

The top ten categories confirm in large part what was demonstrated in the previous table (see **Table 8**). The CIPs showing the largest expected

increase in number of awards include healthcare, business, education, and liberal arts, which are also the largest CIP categories by number of graduates. Nursing-Registered Nurse Training (CIP 511601) will show the largest growth in number of graduates, and four of the top ten CIPs are in the healthcare profession. This is an impressive testament to the growing importance of the healthcare profession in our education system and economy, but the broader impact is even more impressive. Seven out of the top fifteen and fourteen out of the top fifty fastest growing CIPs are also in the healthcare profession.

As we discussed in the methodology section, the colleges and universities assign CIP codes to their graduates. The CIPs showing the largest expected decline in number of graduates (**Table 9**) are in some

cases due to changes in classification. For example, although the CIP with the largest estimated decline is Business/Commerce, General (CIP 520101), a similar CIP (520201) is fourth on the list of top growing programs above (See **Table 8**). Similarly, although Education, General (CIP 130101) is showing a decline, education as a whole is expected to grow substantially through 2018. Those interested in the fields listed in **Table 9** are advised to review the appendix to see if equivalent or near

Seven out of the top fifteen and fourteen out of the top fifty fastest growing programs are in the healthcare profession.

Table 8: Top 10 Growing CIPs

CIP	Program	STEM	Average Graduates Per Academic Year			Growth 2000-08 to 2008-18
			2000-08	2008-18	2018	
511601	Nursing - Registered Nurse Training (RN, ASN, BSN, MSN)		2,251	4,532	5,983	2,280
240101	Liberal Arts and Sciences/Liberal Studies		3,317	5,179	6,317	1,862
510801	Medical/Clinical Assistant		948	2,483	3,420	1,535
520201	Business Administration and Management, General		4,092	5,718	6,392	1,625
130401	Educational Leadership and Administration, General		1,064	1,890	2,395	826
130499	Educational Administration and Supervision, Other		673	1,351	1,749	678
131202	Elementary Education and Teaching		555	995	1,300	440
510805	Pharmacy Technician/Assistant		196	593	840	397
131206	Teacher Education, Multiple Levels		242	617	819	375
510909	Surgical Technology/Technologist		174	515	718	340

equivalent CIPs exist and combine the results above with those equivalent CIPs to get a truer picture of estimated growth.

None of the top 10 STEM (science, technology, engineering, and math) categories appear in the list of fastest growing CIPs (see **Table 10**). As a general observation, the STEM fields are rapidly growing from a small base. The STEM CIP that is expected to add the most graduates is Computer Systems Networking and Telecommunications (CIP 110901) and ranks 20th among all CIPs. The number of graduates is expected to more than double, from 234 to 567 by 2018, but the small size prevents the CIP from appearing on the top ten list above. In fact, of the 10 fastest growing STEM CIPs, eight of them will more than double by 2018, including Web Page Design (CIP 110801), Engineering Technology (CIP 150000), Computer and Information Systems Security (CIP 111003).

We present historical and projected graduates for every CIP by award level in **Appendix 2**. The table is sorted first by award type and then by growth in number of graduates between 2000-2008 and 2008-2018, in descending order. The discussion that follows highlights some of the CIPs in each award type that are projected to show the largest increases in number of graduates.

Awards that require less than one academic year are granted in a wide variety of CIPs. Nine out of the top ten by growth in number of

*As a general observation,
the STEM fields are rapidly
growing from a small base.*

graduates are in the healthcare profession and include Medical/Clinical Assistant, Emergency Medical Technology/Technician (EMT Paramedic), and Medical Insurance Specialist/Medical Biller. Other CIPs that project growth include a number of technical awards in areas such as Aircraft Powerplant Technician, Computer Programming, Landscaping and Groundskeeping, and Criminal Justice/Police Science.

The top ten CIPs for awards requiring at least one academic year but less than two show a similar pattern. Six of the top ten are in the healthcare field and include Medical/Clinical Assistant, Surgical Technology/Technologist, and Medical Office Assistant/Specialist. This category also includes a number of technology/technician awards in the top ten, such as Autobody/Collision and Repair, Alternative Fuel Vehicle, Diesel Mechanics, and Heating, Air Conditioning, Ventilation and Refrigeration.

Few awards require at least two but less than four academic years. Medical Radiologic Technology/Science – Radiation Therapist represents more than half of all awards in this

Table 9: Top 10 Slowest Growing or Declining CIPs

CIP	Program	STEM	Average Graduates Per Academic Year		2018	Decline in Average Annual Awards 2000-08 to 2008-18
			2000-08	2008-18		
520101	Business/Commerce, General		516	149	13	-367
521201	Management Information Systems, General		476	185	76	-291
110101	Computer and Information Sciences, General	Yes	293	129	67	-164

500402	Commercial and Advertising Art		191	126	93	-66
450101	Social Sciences, General		228	198	137	-30
450601	Economics, General		411	382	286	-29
440701	Social Work		533	552	512	20

category, with only 57 awards expected by 2018.

For Associate's Degrees, the CIP showing the largest expected growth in number awards is Liberal Arts and Sciences/Liberal Studies, with a projected increase of approximately 1,200 degrees from 2000-08 to 2008-18. The second largest increase is expected in Nursing – Registered Nurse Training, with a projected growth of 742 awards. Six of the top ten are in the healthcare field. The two STEM awards in the top ten are Computer Systems Networking and Telecommunications, and Web Page, Digital/Multimedia & Information Resources Design.

Quite a bit of variety exists in the Bachelor's degree CIPs expected to show the largest increase in number of graduates. The CIP projected to increase most is Business Administration and Management, General which is projected to grow by 1,243 awards to 4,034 by 2018. Nursing – Registered Nurse Training is projected to grow by 1,101 awards to 3,109. Other CIPs in the top ten of this category include Liberal Arts and Sciences/Liberal Studies, Mass Communication/Media Studies, Music Management and Merchandising, and Teacher Education, Multiple Levels.

Few programs offer a Postbaccalaureate certificate. Elementary Education and Teaching is expected to grow by 89 awards to a total of 178 from 2000-08 to 2008-18, and Teacher Education, Multiple Levels is expected to grow by 12 awards over the same period. All other CIPs in this category project growth of less than 10 awards.

For Master's degrees, the CIPs with the largest projected growth are Education Leadership and Administration (increase of 334 degrees to 1,313 total awards by 2018), Nursing – Registered Nurse Training (increase of 312 degrees to 617 total)

and Business Administration and Management, General (increase of 297 degrees to 1,775 total). The top ten includes four CIPs in education and three CIPs in healthcare. Public Administration is tenth on the list.

Post-Master's certificates are awarded almost entirely in the education field. Educational Administration and Supervision (1,682 awards by 2018) and Educational Leadership and Administration, General (963 awards by 2018) represent over 90 percent of all Post-Master's certificate awards.

For Doctoral degrees, the CIP with the largest projected growth is Physical Therapy/Therapist, which is expected to grow by 126 awards to 276 total awards by 2018. This category is notable for the number of STEM CIPs (five) in the top ten, including Cell/Cellular and Molecular Biology, Materials Engineering, Biology/Biological Sciences, and Oncology and Cancer Biology. In fact, over thirty STEM CIPs project to increase the number of Doctoral degrees granted by 2018.

First-professional degrees are awarded in Pharmacy, Medicine, Veterinary Medicine, Optometry, Dentistry, Law, and Divinity. We project modest declines in the number of awards for Medicine, Divinity and Dentistry, with modest increases in awards for Pharmacy.

Approximately 360 CIPs in various award types project to have zero awards by 2018. Some programs are ending, but in many cases the CIP is simply being redefined or the category reorganized. **Table 11** reflects a summary by award level; refer to **Appendix 4** for a detailed list of the programs expected to produce zero graduates in 2018, sorted by level of award.

SUPPLY AND DEMAND ANALYSIS

The projections of academic awards are linked to the demand side of the labor market using career clusters and career pathways as described more fully in the methodology section. The linkages reported here represent one-to-one matchings of groups of awards and their instructional fields with groups of occupations. However, surpluses or deficits for the overall career pathway can mask underlying surpluses or deficits for specific award-occupation combinations. It is important to recognize that the career paths are routes prospective students may take to progress through different award levels to ultimately secure the academic credentials that are required to support employment in a specific occupation. One implication of the career pathway approach is that the granting of an individual award may not reflect a student's terminal point in the academic pipeline and immediate entry into the labor market.

Table 12 shows the 10 career pathways with the largest projected deficits as measured by discrepancies between annual position openings on the demand side of the market when compared against average annual awards granted on the supply side of the market. These figures do not

account for any potential in-migration that might help fill the identified shortfalls. **Appendix 6** includes detail on the full range of career clusters and career pathways; **Appendix 7** provides additional information on “High-Need Fields” to support the 2010–15 Performance Funding Cycle. Because the supply-side projections only focus on awards beyond the Associate's level, the supply of lower level awards as well as job openings requiring lower level awards are omitted from the table. As shown, four of the career paths include some STEM designated award(s): Programming and Software Development, Environmental Service Systems, Construction, and Biotechnology Research and Development. Note that Environmental Service Systems is projected to produce an average of *zero* awards between 2008 and 2018. (See **Appendix 4** for a list of award categories expected to produce zero graduates in 2018, including many STEM designated fields.)

The Programming and Software Development pathway is projected to have the largest annual shortfall between annual award production and annual position openings (a deficit of 397 per year). The Business Financial Management and

Table 12: Top 10 Under-Supplied Paths

Career Path	STEM	Average Graduates Per Academic Year ¹		Average Openings ² 2008–18	Average Annual Graduate Deficit	Supply to Demand Ratio
		2000–08	2008–18			
11.4 Programming and Software Development Pathway	Yes	131	281	678	-397	0.41
4.5 Marketing		9	37	397	-360	0.09
4.3 Human Resources Pathway		73	140	447	-307	0.31
4.2 Business Financial Management and Accounting Pathway		1,319	1,192	1,376	-184	0.87
1.6 Environmental Service Systems Pathway	Yes	7	0	149	-149	–
2.2 Construction Pathway	Yes	19	88	200	-112	0.44
12.1 Correction Services Pathway		14	24	104	-80	0.23
6.2 Business Financial Management Pathway		2	1	79	-78	0.01
4.6 Administrative and Information Support Pathway		183	113	181	-68	0.62
8.5 Biotechnology Research and Development	Yes	8	23	70	-48	0.32

1. Award levels less than an associate's degree are excluded.

2. Job openings with educational requirements lower than an associate's degree are excluded.

Accounting pathway will produce the largest number of annual awards of any of the career pathways shown in **Table 13** (1,192 per year), but will still yield an annual shortfall of 184 due to strong employer demand.

The Environmental Service Systems pathway is projected to produce no awards between 2008 and 2018, a reflection of a decline in historical award production between 2000 and 2008. However, businesses in Tennessee can be expected to hire an average of 149 workers in this field over the same time period. Shortfalls such as this will need to be filled through other means, including the recruitment of award recipients from outside Tennessee. The Business Financial Management pathway is expected to produce only one award per year while Tennessee employers will need to hire 79 workers a year producing an annual deficit of 78 positions.

The 10 career pathways anticipated to have the largest average annual surpluses of award recipients are shown in **Table 13**. Two of the pathways—Science and Mathematics and Engineering and Technology—include some STEM designated award(s). The surpluses shown in the table could reflect the fact that the analysis is focused on career pathways that include awards that do not take an individual directly to a career. It is also the case that the demand side of the market in Tennessee

simply does not yield a large number of average annual openings for these fields. In other words, if the state had more employers requiring workers with STEM credentials, the shortfall would be smaller or could conceivably vanish. To the extent that supply does exceed demand, one would expect award recipients to seek employment outside the state of Tennessee.

Like **Table 12**, awards below an Associate's degree and occupations requiring awards or training below an Associate's degree are omitted from the data. Surprisingly, the Teaching/Training pathway shows a large annual average surplus in awards relative to demand. There are two primary explanations for this seemingly anomalous finding. First, the analysis here considers award production from Tennessee institutions of higher education. In practice many of these award recipients will choose to work outside the state, others will work in fields outside education and some will simply not work at all. (**Appendix 5** provides information by academic field on the share of graduates who are working in Tennessee in some job three quarters after the receipt of a degree.) Second, a large share of the awards are at the Associate's level and do not reflect individuals with the credentials to enter the classroom as a regular teacher (see the detailed data on Teaching/Training pathway 5.3 in **Appendix 6**). For a detailed and focused analysis

Table 13: Top 10 Over-Supplied Paths

Career Path	STEM	Average Graduates Per Academic Year ¹		Average Openings ²	Average Annual Graduate Surplus	Supply to Demand Ratio
		2000–08	2008–18	2008–18		
5.3 Teaching/Training Pathway		8,934	12,499	3,407	9,092	3.67
8.1 Therapeutic Services Pathway		6,637	10,809	3,143	7,666	3.44
15.2 Science and Mathematics Pathway	Yes	4,739	5,827	300	5,527	19.42
4.1 Management Pathway		5,230	6,532	1,882	4,650	3.47
5.1 Administrative and Information Support Pathway		1,950	3,651	371	3,280	9.84
3.5 Journalism and Broadcasting Pathway		1,201	1,829	144	1,685	12.70
3.4 Performing Arts Pathway		1,091	1,549	213	1,336	7.27
15.1 Engineering and Technology Pathway	Yes	1,636	1,929	608	1,321	3.17
7.1 Governance Pathway		751	1,275	94	1,181	13.56
10.2 Counseling and Mental Health Services Pathway		1,300	1,762	723	1,039	2.44

1. Award levels less than an associate's degree are excluded.

2. Job openings with educational requirements lower than an associate's degree are excluded.

of teacher supply and demand in Tennessee, see *Supply and Demand for Teachers in Tennessee*, <http://cber.bus.utk.edu/pubs/bfox269.pdf>.

The Therapeutic Services pathway (8.1) also yields a large implied surplus with average annual openings of 3,143 compared to average annual graduate production of 10,809. The surplus—7,666 per year—places this pathway in second place for an overage in Table 13. However, on face value these findings appear to be inconsistent with a 2009 report “Forecasting Supply, Demand, and Shortage of Nurses in Tennessee” that identified significant shortfalls in supply relative to demand by 2020 (<http://www.centerfornursing.org/research/Forecasting%20Supply%20%20Demand%20in%20TN%20June%2025%202009.pdf>). The reason is that the 2009 study considered only licensed registered nurses and practical

nurses, while the Therapeutic Services pathway includes a much wider range of study areas on the supply side of the market than simply nursing. For example, pathway 8.1 includes general psychology (with annual bachelor’s degree production of 1,827), dental assistants (586 awards per year), pharmacy technicians (593 awards per year) and first-professional degree pharmacists (126 per year).

The other career pathways all produce large surpluses. In some instances these surpluses are likely to be real, while in other instances they may simply reveal issues like those that surface in the context of the teaching/training pathway. For example, individuals will migrate to pursue employment options elsewhere or simply choose not to work.

APPENDIX 3: SHARE OF 2008 AWARDS GRANTED BY PUBLIC VERSUS PRIVATE INSTITUTIONS

CIP	Program	STEM	Percentage granted by public institutions
010000	Agriculture, General	Yes	98.7
010101	Agricultural Business and Management, General	Yes	100.0
010102	Agribusiness/Agricultural Business Operations	Yes	100.0
010103	Agricultural Economics	Yes	100.0
010199	Agricultural Business and Management, Other	Yes	100.0
010601	Applied Horticulture/Horticultural Operations, General	Yes	100.0
010603	Ornamental Horticulture	Yes	100.0
010605	Landscaping and Groundskeeping	Yes	100.0
010699	Applied Horticulture/Horticultural Business Services, Other	Yes	100.0
010901	Animal Sciences, General	Yes	100.0
011001	Food Science	Yes	100.0
011101	Plant Sciences, General	Yes	100.0
011105	Plant Protection and Integrated Pest Management	Yes	100.0
011202	Soil Chemistry and Physics	Yes	100.0
030101	Natural Resources/Conservation, General	Yes	40.0
030103	Environmental Studies	Yes	91.7
030104	Environmental Science	Yes	0.0
030201	Natural Resources Management and Policy	Yes	100.0
030501	Forestry, General	Yes	100.0
030502	Forest Sciences and Biology	Yes	0.0
030601	Wildlife and Wildlands Science and Management	Yes	89.4
040201	Architecture (BArch, BA/BS, MArch, MA/MS, PhD)		100.0
040301	City/Urban, Community and Regional Planning		100.0
040401	Environmental Design/Architecture		100.0
050102	American/United States Studies/Civilization		0.0
050103	Asian Studies/Civilization		0.0
050104	East Asian Studies		0.0
050106	European Studies/Civilization		0.0
050107	Latin American Studies		0.0
050110	Russian Studies		0.0
050114	Western European Studies		0.0
050201	African-American/Black Studies		81.8
050207	Women's Studies		54.5
059999	Area, Ethnic, Cultural, and Gender Studies, Other		98.4
090101	Communication Studies/Speech Communication and Rhetoric		66.3
090102	Mass Communication/Media Studies		93.7
090199	Communication and Media Studies, Other		0.0
090401	Journalism		80.0
090402	Broadcast Journalism		0.0
090499	Journalism, Other		95.1
090701	Radio and Television		100.0
090702	Digital Communication and Media/Multimedia		0.0
090901	Organizational Communication, General		0.0
090902	Public Relations/Image Management		48.6
090903	Advertising		64.2
090999	Public Relations, Advertising & Applied Communication, Other		0.0
099999	Communication, Journalism, and Related Programs, Other		75.0
100105	Communications Technology/Technician		100.0
100203	Recording Arts Technology/Technician		30.0
100304	Animation, Interactive Technology, Video Graphics & Special Effects		95.7

CIP	Program	STEM	Percentage granted by public institutions
110101	Computer and Information Sciences, General	Yes	62.9
110103	Information Technology	Yes	0.0
110199	Computer and Information Sciences, Other		0.0
110202	Computer Programming, Specific Applications	Yes	100.0
110301	Data Processing and Data Processing Technology/Technician	Yes	0.0
110401	Information Science/Studies	Yes	72.7
110601	Data Entry/Microcomputer Applications, General		0.0
110699	Data Entry/Microcomputer Applications, Other		0.0
110701	Computer Science	Yes	71.8
110801	Web Page, Digital/Multimedia & Information Resources Design	Yes	8.3
110899	Computer Software and Media Applications, Other		0.0
110901	Computer Systems Networking and Telecommunications	Yes	21.6
111001	System Administration/Administrator	Yes	0.0
111002	System, Networking, and LAN/WAN Management/Manager	Yes	100.0
111003	Computer and Information Systems Security	Yes	1.1
111004	Web/Multimedia Management and Webmaster	Yes	0.0
111099	Computer/Info Technology Services Administration & Management, Other		100.0
119999	Computer and Information Sciences & Support Services, Other		0.0
120301	Funeral Service and Mortuary Science, General		0.0
120401	Cosmetology/Cosmetologist, General		0.0
120406	Make-Up Artist/Specialist		0.0
120409	Aesthetician/Esthetician and Skin Care Specialist		0.0
120410	Nail Technician/Specialist and Manicurist		0.0
120499	Cosmetology and Related Personal Grooming Arts, Other		0.0
120503	Culinary Arts/Chef Training		70.4
130101	Education, General		49.8
130301	Curriculum and Instruction		61.5
130401	Educational Leadership and Administration, General		65.5
130404	Educational, Instructional, and Curriculum Supervision		0.0
130406	Higher Education/Higher Education Administration		6.3
130499	Educational Administration and Supervision, Other		0.0
130501	Educational/Instructional Media Design		100.0
130701	International and Comparative Education		0.0
131001	Special Education and Teaching, General		54.8
131003	Education/Teaching of Individuals with Hearing Impairments incl. Deafness		0.0
131015	Education/Teaching of Individuals in Early Childhood Special Educ Programs		0.0
131099	Special Education and Teaching, Other		0.0
131101	Counselor Education/School Counseling and Guidance Services		72.3
131102	College Student Counseling and Personnel Services		100.0
131201	Adult and Continuing Education and Teaching		0.0
131202	Elementary Education and Teaching		16.2
131203	Junior High/Intermediate/Middle School Education & Teaching		69.2
131205	Secondary Education and Teaching		41.8
131206	Teacher Education, Multiple Levels		68.1
131209	Kindergarten/Preschool Education and Teaching		0.0
131210	Early Childhood Education and Teaching		63.8
131299	Teacher Education & Professional Development, Specific Levels & Methods, Other		69.4
131301	Agricultural Teacher Education		100.0
131302	Art Teacher Education		64.0
131303	Business Teacher Education		97.0

CIP	Program	STEM	Percentage granted by public institutions
131305	English/Language Arts Teacher Education		56.0
131306	Foreign Language Teacher Education		100.0
131307	Health Teacher Education		90.6
131308	Family & Consumer Sciences/Home Economics Teacher Education		25.0
131309	Technology Teacher Education/Industrial Arts Teacher Education		46.2
131311	Mathematics Teacher Education		35.5
131312	Music Teacher Education		8.6
131314	Physical Education Teaching and Coaching		6.8
131315	Reading Teacher Education		66.7
131316	Science Teacher Education/General Science Teacher Education		100.0
131318	Social Studies Teacher Education		88.5
131319	Technical Teacher Education		100.0
131322	Biology Teacher Education		12.5
131324	Drama and Dance Teacher Education		0.0
131325	French Language Teacher Education		0.0
131327	Health Occupations Teacher Education		0.0
131328	History Teacher Education		19.5
131330	Spanish Language Teacher Education		16.7
131332	Geography Teacher Education		0.0
131335	Psychology Teacher Education		0.0
131399	Teacher Education & Professional Development, Specific Subject Areas, Other		90.9
131401	Teaching English as a Second or Foreign Language/ESL Language Instructor		3.8
139999	Education, Other		0.0
140101	Engineering, General	Yes	96.9
140201	Aerospace, Aeronautical and Astronautical Engineering	Yes	100.0
140301	Agricultural/Biological Engineering and Bioengineering	Yes	100.0
140401	Architectural Engineering	Yes	100.0
140501	Biomedical/Medical Engineering	Yes	14.2
140701	Chemical Engineering		54.9
140801	Civil Engineering, General	Yes	75.6
140901	Computer Engineering, General	Yes	78.3
141001	Electrical, Electronics and Communications Engineering	Yes	74.9
141101	Engineering Mechanics	Yes	0.0
141301	Engineering Science	Yes	55.8
141401	Environmental/Environmental Health Engineering	Yes	73.9
141801	Materials Engineering	Yes	100.0
141901	Mechanical Engineering	Yes	71.4
142301	Nuclear Engineering	Yes	100.0
142701	Systems Engineering		100.0
143101	Materials Science	Yes	0.0
143201	Polymer/Plastics Engineering	Yes	100.0
143501	Industrial Engineering	Yes	100.0
149999	Engineering, Other		0.0
150000	Engineering Technology, General	Yes	100.0
150101	Architectural Engineering Technology/Technician	Yes	100.0
150201	Civil Engineering Technology/Technician	Yes	100.0
150303	Electrical, Electronic & Communications Engineering Technology/Technician	Yes	47.5
150399	Electrical & Electronic Engineering Technologies/Technicians, Other		0.0
150501	Heating, Air Conditioning & Refrigeration Technology/Technician (ACH/ACR/ACHR/HRAC/HVAC/AC Technology)	Yes	0.0

CIP	Program	STEM	Percentage granted by public institutions
150612	Industrial Technology/Technician	Yes	100.0
150613	Manufacturing Technology/Technician	Yes	100.0

110401	Information Science/Studies	Yes	25	9
110701	Computer Science	Yes	24	0
110201	Computer Programming/Programmer, General	Yes	21	0
510716	Medical Administrative/Executive Assistant & Medical Secretary		20	0
150201	Civil Engineering Technology/Technician	Yes	14	4
161603	Sign Language Interpretation and Translation		12	2
151399	Drafting/Design Engineering Technologies/Technicians, Other (NEW)		11	0
470101	Electrical/Electronics Equipment Installation & Repair, General		10	2
010000	Agriculture, General	Yes	9	2
240199	Liberal Arts & Sciences, General Studies & Humanities, Other		9	0
150403	Electromechanical Technology/Electromechanical Engineering Technology	Yes	8	0
260209	Radiation Biology/Radiobiology	Yes	7	0
410301	Chemical Technology/Technician	Yes	6	0
470303	Industrial Mechanics and Maintenance Technology		5	0
479999	Mechanic and Repair Technologies/Technicians, Other		4	0
480503	Machine Shop Technology/Assistant		4	0
500702	Fine/Studio Arts, General		3	0
511102	Pre-Medicine/Pre-Medical Studies		3	0
480508	Welding Technology/Welder		3	0
520402	Executive Assistant/Executive Secretary		2	0

CIP	Program	STEM	Average Graduates Per Academic Year	
			2000–08	2008–18
Associate degrees (continued)				
521905	Tourism and Travel Services Marketing Operations (NEW)		2	0
150507	Environmental Engineering Technology/Environmental Technology	Yes	2	0
500901	Music, General		2	0
150503	Energy Management and Systems Technology/Technician	Yes	2	0
511699	Nursing, Other		2	0
090701	Radio and Television		1	0
389999	Philosophy and Religious Studies, Other		1	0
420101	Psychology, General		1	1
512306	Occupational Therapy/Therapist		1	2
030511	Forest Technology/Technician (NEW)	Yes	1	0
090101	Communication Studies/Speech Communication and Rhetoric		1	0
150701	Occupational Safety and Health Technology/Technician	Yes	1	0
390604	Pre-Theology/Pre-Ministerial Studies		1	0
520901	Hospitality Administration/Management, General		1	0
521299	Management Information Systems and Services, Other		1	0
150405	Robotics Technology/Technician	Yes	1	0
220001	Pre-Law Studies		1	0
150401	Biomedical Technology/Technician	Yes	1	0
100202	Radio and Television Broadcasting Technology/Technician		0	0
230101	English Language and Literature, General		0	0
240103	Humanities/Humanistic Studies		0	0
390699	Theological and Ministerial Studies, Other		0	0
450101	Social Sciences, General		0	0
510912	Physician Assistant		0	0
149999	Engineering, Other		0	0
159999	Engineering Technologies/Technicians, Other		0	0
540101	History, General		0	0
040201	Architecture (BArch, BA/BS, MArch, MA/MS, PhD)		0	0
090499	Journalism, Other		0	0
190709	Child Care Provider/Assistant		0	0
190901	Apparel and Textiles, General		0	0
310505	Kinesiology and Exercise Science		0	1
451101	Sociology		0	0
480507	Tool and Die Technology/Technician		0	0
510913	Athletic Training/Trainer		0	1
520399	Accounting and Related Services, Other		0	0

APPENDIX 5: SHARE OF 2008 AWARD RECIPIENTS WORKING IN TENNESSEE THREE QUARTERS AFTER GRADUATION

CIP	Program	Total number graduates (N)	Awards of less than 1 acad yr	Awards at least 1 but less than 2 acad yrs	Associate degrees	Bachelor's degrees	Masters degrees	Doctoral degrees	First-professional degrees	All awards
010000	Agriculture, General	1,006	-	-	34.9	58.4	41.7	0.0	-	57.0
010101	Agricultural Business and Management, General	6	-	-	-	-	66.7	-	-	66.7
010102	Agribusiness/Agricultural Business Operations	166	-	-	-	68.1	-	-	-	68.1
010103	Agricultural Economics	61	-	-	-	-	43.6	33.3	-	42.6
010199	Agricultural Business and Management, Other	114	-	-	-	57.0	-	-	-	57.0
010201	Agricultural Mechanization, General	1	-	-	-	0.0	-	-	-	0.0
010601	Applied Horticulture/Horticultural Operations, General	1	-	-	0.0	-	-	-	-	0.0
010603	Ornamental Horticulture	423	-	-	63.9	51.4	52.0	-	-	53.9
010605	Landscaping and Groundskeeping	6	66.7	-	-	-	-	-	-	66.7
010608	Floriculture/Floristry Operations and Management	14	71.4	-	-	-	-	-	-	71.4
010699	Applied Horticulture/Horticultural Business Services, Other	8	-	-	25.0	-	-	-	-	25.0
010901	Animal Sciences, General	535	-	-	-	57.8	35.3	20.0	-	55.0
011001	Food Science	120	-	-	-	35.1	27.5	58.3	-	34.2
011101	Plant Sciences, General	424	-	-	-	61.4	31.8	35.3	-	57.3
011105	Plant Protection and Integrated Pest Management	50	-	-	-	-	30.0	-	-	30.0
030101	Natural Resources/Conservation, General	5	-	-	-	-	-	0.0	-	0.0
030103	Environmental Studies	231	-	-	-	60.1	57.8	50.0	-	59.3
030201	Natural Resources Management and Policy	198	-	-	-	62.6	-	-	-	62.6
030501	Forestry, General	170	-	-	-	40.3	34.8	-	-	38.8
030601	Wildlife and Wildlands Science and Management	411	-	-	-	59.0	31.6	-	-	55.2
040201	Architecture (BArch, BA/BS, MArch, MA/MS, PhD)	420	-	-	-	48.7	45.1	-	-	48.1
040301	City/Urban, Community and Regional Planning	184	-	-	-	-	42.4	-	-	42.4
040401	Environmental Design/Architecture	3	-	-	-	33.3	-	-	-	33.3
050201	African-American/Black Studies	36	-	-	-	63.9	-	-	-	63.9
050207	Women's Studies	1	-	-	-	100.0	-	-	-	100.0
059999	Area, Ethnic, Cultural, and Gender Studies, Other	373	-	-	-	53.4	-	-	-	53.4
090101	Communication Studies/Speech Communication and Rhetoric	893	-	-	-	71.3	50.6	27.1	-	63.3
090102	Mass Communication/Media Studies	3,014	-	-	-	67.8	64.1	25.0	-	67.5
090401	Journalism	1,595	-	-	-	63.7	53.6	-	-	62.9
090499	Journalism, Other	2	-	-	-	50.0	-	-	-	50.0

CIP	Program	Total number graduates (N)	Awards of less than 1 acad yr	Awards at least 1 but less than 2 acad yrs	Associate degrees	Bachelor's degrees	Masters degrees	Doctoral degrees	First-professional degrees	All awards
090701	Radio and Television	610	-	-	-	59.0	-	-	-	59.0
090903	Advertising	586	-	-	-	54.1	-	-	-	54.1
099999	Communication, Journalism, and Related Programs, Other	1	-	-	-	100.0	-	-	-	100.0
100304	Animation, Interactive Technology, Video Graphics & Special Effects	23	-	-	-	60.9	-	-	-	60.9
110101	Computer and Information Sciences, General	1,024	-	-	75.3	59.8	60.0	-	-	65.8
110202	Computer Programming, Specific Applications	43	72.1	-	-	-	-	-	-	72.1
110203	Computer Programming, Vendor/Product Certification	2	100.0	-	-	-	-	-	-	100.0
110401	Information Science/Studies	59	75.0	-	68.1	-	-	-	-	69.5
110501	Computer Systems Analysis/Analyst	9	75.0	100.0	-	-	-	-	-	77.8
110701	Computer Science	1,622	-	-	83.7	53.9	50.6	44.4	-	54.1
110801	Web Page, Digital/Multimedia & Information Resources Design	8	50.0	-	-	-	-	-	-	50.0
110899	Computer Software and Media Applications, Other	27	77.8	-	-	-	-	-	-	77.8
110901	Computer Systems Networking and Telecommunications	212	0.0	-	79.1	-	-	-	-	78.8
111002	System, Networking, and LAN/WAN Management/Manager	1	-	0.0	-	-	-	-	-	0.0
111099	Computer/Information Technology Services Administration & Management, Other	10	-	-	80.0	-	-	-	-	80.0
119999	Computer and Information Sciences & Support Services, Other	14	42.9	-	-	-	-	-	-	42.9
120503	Culinary Arts/Chef Training	57	66.7	-	83.3	-	-	-	-	73.7
130101	Education, General	2,524	-	-	-	-	74.0	46.7	-	70.4
130301	Curriculum and Instruction	3,133	-	-	-	-	82.2	71.4	-	81.5

APPENDIX 6: CAREER PATHWAYS—SUPPLY AND DEMAND PROJECTIONS

A Brief Users Guide to Appendix 6

This appendix includes detailed data for each of the career pathways included in the report. The methodology used to develop the estimates is included in the report narrative. All individual instructional programs and all award levels contributing to career pathway supply are presented first. The average number of graduates for the historical 2000-2008 academic year period, the projected number of graduates for academic year 2018 and the average number of awards projected to be granted between the 2008-2018 academic years are included in the supply panel of the tables.

All occupations contributing to career pathway demand are presented next, regardless of the training/education required for the position. Estimates of average annual openings for 2008-2018 are reported for each occupation. The estimates were developed by the Tennessee Department of Labor and Workforce Development.

Two panels of summary data appear at the end of each career pathway. The first panel provides overall estimates of supply and demand *regardless of award level and minimum educational requirement*. Figures are presented showing Demand minus Supply and the Supply to Demand Ratio. These figures indicate whether the career path is projected to have an annual surplus

or shortfall of awards relative to occupational demand. For example, career pathway 1.1, the Food Products and Processing Systems Pathway, yields annual supply of 31 versus annual position openings of 552. This produces a difference between demand and supply of 521 and a supply to demand ratio of 0.06 which reflects a shortfall.

The final panel of the career pathway tables restricts supply to only awards at the Associate's level or higher; demand is similarly confined to occupations requiring a minimum of an Associate's degree. These figures provide additional clarity on whether or not there are supply and demand imbalances for the majority of awards produced by institutions of higher education in Tennessee. Referring again to career pathway 1.1, annual supply is still projected to be 31 per year since the minimum award level for this field is an Associate's degree. However, the vast majority of jobs on the demand side of the labor market for this career pathway require no formal academic award. In fact, only 9 positions per year require an Associate's degree or higher—in this instance all of the positions require a Bachelor's degree. These adjustments produce a difference between demand and supply of -22 and a supply to demand ratio of 3.48 indicating a surplus for positions and instructional programs requiring at least an Associate's degree. A supply to demand ratio of 1 means supply is perfectly calibrated to demand.

APPENDIX 7: HIGH-NEED FIELD CROSSWALK

Each year, public institutions of higher education in Tennessee participate in the Performance Funding program, an assessment process which allows institutions to earn additional funding (up to 5.45 percent of the institution's state appropriation) based on a common set of quality measures.

During the 2010-15 cycle, the Tennessee Higher Education Commission provided institutions with the option to select a new student sub-population, High-Need Fields, for inclusion as a Performance Funding standard. This option gives institutions the opportunity to focus on student success in enrolling in, persisting in, and completing degree programs that have been identified as "high need."

The table included in this appendix is extracted in part from the more detailed and comprehensive tables presented in **Appendix 6**. However, it is important to note that in certain cases in this appendix, specifically nursing and teaching, data were utilized from outside the current study. In both instances, inclusion was based on recent well-established reports that indicate a future deficit of teachers and nurses in Tennessee.

The 2009 Tennessee Center for Nursing Supply and Demand Forecast, which was based on updated models of previous research by the federal Health Resources and Services Administration, provides a projection of the need for registered nurses in Tennessee over the next ten years. The forecast is available online at www.centerfornursing.org. Based on this study, Tennessee can expect an increasing deficit of registered nurses as the decade progresses, reaching an eventual shortage of 14,910 RNs in 2020.

The identification of the Teaching and Training pathway as a high-need field was supported by a recent CBER study, "Supply and Demand for Teachers in Tennessee," available online at <http://cber.utk.edu/pubs/bfox269.pdf>. This December

2009 report found that a gap in teacher supply (the available graduates and other teacher sources) would reach 31,431 teachers by 2014. CBER also concluded that even with the usual teacher supply pipelines operating, the deficit will only be reduced by half, indicating that attainment among students at Tennessee's current teacher preparation programs, as well as the availability of alternative routes to certification, is of optimum importance.

Instructions for Institutional Usage in Performance Funding

Institutions that select the High-Need subpopulation for inclusion in the Performance Funding program will need to utilize the information in the table below to determine which academic programs are eligible to be submitted as a High-Need program. This document correlates occupational fields with academic offerings, and CIPs are listed according to the broad "career pathway" developed by the U.S. Department of Education, all of which are eligible CIPs that may be submitted as a High-Need field.

This table includes degrees at all levels, from college-level certificates and Associate's degrees to post-graduate offerings. Once an institution elects to participate in the High-Need field portion of Performance Funding, it needs to select which CIPs are part of its academic catalog and enter that information on the Performance Funding Sub-Population form.

It is important to note that if an institution has selected Health Programs or Science, Technology, Engineering or Mathematics (STEM) Programs as a student sub-population, the High-Need CIPs that are selected must not be from these fields. Health and STEM CIPs are denoted with an asterisk on the Crosswalk table.
